WHY THIS EVENT MATTERS

Cornwall faces some of the highest mental health challenges in the country. More than 37,000 people in Cornwall were in contact with mental health or support services last year and more than 150 crisis calls are made every day. Many young people wait over a year for help and long waiting lists mean many adults go without support. Pentreath helps to fill this gap by providing one-to-one support, wellbeing programmes and employment guidance. Your attendance at the Evening of Change helps ensure that no one in Cornwall is left to struggle alone. These pressures also affect our workplaces, where rising stress, burnout and poor mental health impact staff wellbeing, productivity and business resilience across Cornwall.

Demand has never been higher and your support directly changes lives.
